BUTTERNUT SQUASH

95-102 days

We are now offering a straight, thick necked strain of Butternut which is considerably more desirable than the strains previously offered which were inclined to have a crooked slim neck. Fruits are 10 to 12 inches in length and 4 to 5 inches at largest diameter. The photograph clearly indicates the superiority of our new strain, in that it is almost 100% usable. Flesh is dry and yellow, and it keeps well. Excellent for pies. Also fine baked or boiled.

seeds Spergon

A good fungicide for treating seeds, with resulting increases in stand and yield. Suitable for any kind of seeds, it is SAFE for delicate seeds and safer for the operator, PROTECTS against "damping off" and seed decay. STIMULATES growth, healthy plants and higher yields. It may be used with inoculants, and peas treated with it require no graphite. It retains its strength, coats evenly, adheres well. Contains no mercury or copper.
